

Touchpoll Jamaica offers real time feedback surveys

TouchPoll Jamaica Touchscreen market research system is levelling the field for small businesses finally allowing such entities to conduct cost effective customer surveys. Gone are the days when only big business could afford to survey their customers in regards to their product and service delivery.

TouchPoll Jamaica carries out its survey via the use of state-of-the-art Touchscreen computers and the TouchPoll software, virtually eliminating the need for paper based survey evaluation. With this method of research the survey questionnaires are designed on the touchscreen computer terminal which sees respondents merely touching the screen to provide feedback evaluation. The system can be customised to the research need of any client and has been gaining traction in regards to many local events recently.

The automated method of carrying out these surveys has provided a number of benefits to TouchPoll Jamaica clients as results can be available as soon as the last person has provide their feedback response. The touchscreen survey terminals dramatically increase the number of respondents that typically are willing to complete a survey questionnaire, thus allowing for excellent demographic in addition to significantly reduced turn around time for research results.

TouchPoll Jamaica is the leading

supplier of Touchscreen Market and Opinion Research Survey Services. TouchPoll solutions are utilized in a variety of vertical market applications.

TouchPoll Jamaica offers a full line of survey options to clients, from an entity that wants to do a

short-term one-off evaluation/event or for an organization that wants to do year round data collection e.g., a hotel. Surveys can be customized to these client groupings depending on their unique product specifications.
